DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Abstract

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

For this applicant, the abstract has more than 150 words.

Specification

The disclosure is objected to because of the following informalities:

Specification, page 7, lines 1-2, "Figure 18" should be changed to "Figures 18A, 18B and 18C"

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in United Kingdom on 07/16/2002. It is noted, however, that applicant has not filed a certified copy of the 0216490.3 application as required by 35 U.S.C. 119(b).

Claim Objections

Claims 12, 23 are objected to because of the following informalities:

- 1) Claim 12, line 2, "-layer" should be change to "multi-layer".
- 2) Claim 23, lines 2-3, "the receivers" should be changed to "the detectors" to provide proper antecedent and basis.

Allowable Subject Matter

Claims 1-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Prior arts of record do not disclose a liquid volume-flow meter. The meter comprises: an optical velocity array, an optical area sensor, wherein the optical area sensor comprises a plurality of arrays including a backscatter reflection array to estimate the height of liquid within the measuring chamber and at least one further correction array to correct the estimation made by the reflection array which structurally arranged and functionally operated as claimed in claims 1,25.

Art Unit: 2877

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
